

EMS TDR (Entrance Matting Systems Tretford Design Range) Aluminium Grid Entrance Matting

TYPICAL SPECIFICATION

N10 General Fixtures/Furnishings/Equipment

300 Entrance Matting

40 Miscellaneous Fittings

Reference	EMS Tretford Design Range (TDR)
Height	12mm
Insert	<p>Natural goat hair infills available in 60 Tretford colours</p>  
Installation	Recessed in matwell or surface-laid with ramp frame

DETAILED SPECIFICATION

Reference	EMS Tretford Design Range (TDR)
Conformity	Manufactured to ISO9001:2008. Conforms to current BS8300 DDA Regulations Flammability: BS4790: 1987: Mean Radius of burning – 25mm. Class – Low. IBM and ICL Electrical Resistance: Tested at 40% RH and 20°C – Passed.
Grid Construction	Aluminium – Minimum 95% recycled content in closed construction format
Insert	Natural goat hair infills available in 60 Tretford colours
Height	12mm
Module Size	EMS panels are manufactured specifically to customer requirements. Panel lengths available up to 4000mm left to right as required (Anodised panel lengths vary – see below)
Installation	Recessed in matwell or surface-laid with ramp frame. Suitable for use with underfloor heating.
Anodising Options	Aluminium grid system and framework to suit can be anodised in colours: Black – Available in 4000mm module length Light Gold – Available in 2600mm module length Medium Gold - Available in 2600mm module length Dark Gold - Available in 2600mm module length Gun Metal Grey – 2500mm Maximum Panel length Light Bronze - 1600mm Maximum Panel length Medium Bronze – 4000mm Maximum Panel length Dark Bronze – 4000mm Maximum Panel Length
Light Fastness	BS 1006: 1990 5-6 very slight to none
Water Fastness	BS 1006: 1990 4 very slight
Rubbing Fastness	BS 1006: 1990 4 very slight
Accreditations	Global Green Tag Certified - GreenRate Level A

Description

EMS Tretford Design Range aluminium grid entrance matting is a primary matting system for specification in commercial applications where the removal of footborne dirt is essential. EMS products are manufactured for high traffic areas such as residential and care homes, medical practice, offices and administrative buildings, family homes, hotels, retail sectors, shopping centres, schools, hospitals and airports to name a few.

The matting is bespoke made. Each front to back panel has a male and female edge which interlock together. Any left to right size can be achieved by simply butting the panels together. No T-Bar is required.

All EMS matting systems come with a 15 year guarantee and interchangeable infills. Full details of conditions and limits of guarantees are available upon request.
